

Midsummer Bonfire

It's a Midsummer song for all who were here
So come gather close and forget all your fears
Drink with me now as the fire is burning tonight

It's a Midsummer song for the near and far
We're counting the satellites, we're counting the stars
Hold me close as the fire is burning tonight

I'm not going
Far from your side so stay with me tonight
In the morning
Will you still be here with me?

It's a Midsummer song for the memories past
Of this sacred place so lets all raise a glass
And drink with me now as the fire is burning tonight

It's a Midsummer song for the lovers and friends
The is our story no beginning no end
And hold me close as the embers are dancing tonight

I'm not going
Far from your side so stay with me tonight
In the morning
Will you still be here with me?

All our hopes
All our fears
Will be laid down here
All our hopes etc.
